CREO-FEN TEN TERMITE AND WATERPROOF COATING

For Timbers and Damp-course for Masonry (Black Jack)

TERM-seal Creo-Fen Ten is a hard weathering termite proofing compound for use on timbers; posts poles and wooden structures. The product is an aqueous bitumen and acrylic polymer based formulation containing 1g/L Bifenthrin as the active constituent. When cured and unbroken it forms a flexible, subterranean termite proof coating. This product is applicable by brush or roller.

Creo-Fen Ten is available and forms to quantities:

- * 4 litre pail for easy access to individual posts
- * 10 litre bucket for bulk pre-treatment erecting
- * 200 litre barrel for those larger jobs.

Coverage is estimated @ 0.8 litres per square metre - barrel delivery must be quoted on request.
