

ezipier™ ezibrace™

ADJUSTABLE STEEL PIERS & STUMPS FOR ALL FLOORS

AVAILABLE HERE

TIMBER

Supports all timber bearers, typically hardwood or engineered LVL bearers such as Red Alert or Hyspan.

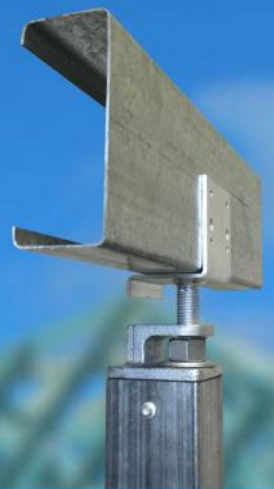

BOXSPAN

Supporting 50mm wide roll formed Boxspan bearers. Also come part of a designed kit sub-floor system.

RHS

Ideal for standard lengths of steel, rectangular hollow sections such as Duragal, Allgal and Supagal.

C-SECTION

Suits the average 140mm – 150mm deep open C-Section sub-floors.

WHY THE CHOICE IS EZI

EZIPIER – FLUSH TO BUILDING LINE

Designed so piers do not protrude outside the building line making it a neater finish for all trades.

EZIBRACE – HIGH CAPACITY, FAST INSTALLATION

A high capacity bracing system that's easy to install on low-set and high-set elevated floors.

ENGINEERED AND CERTIFIED

Ezipier heads and bases have been engineered in a variety of sizes to suit most site loads.
